(54) Title: METHOD AND ARRANGEMENT IN A TELECOMMUNICATION SYSTEM

(57) Abstract: The present invention relates to methods and arrangements in a mobile 3rd generation communication system and user equipments for collecting relevant charging information from user equipments using broadcast/multicast services. The present invention introduces an uplink channel for transmitting control information related to said service and a decoding key that enables the user equipment to decode at least a part of the data that is broadcasted by said service.
